Indoor Panel Blinds

/ indoor blinds

Panel blinds provide a modern solution for large windows and sliding or bi-fold doors, while offering the latest in functionality, light control, privacy and interior styling.

We offer you a beautiful system with high quality aluminium tracks, and a choice of bottom rails to ensure the panels glide effortlessly open & closed.

Available with child safe wand control, panel blinds offer a stylish alternative to vertical blinds that look fabulous in both contemporary and traditional interior design schemes.

Note: Panel blinds are recommended for face fix and stacking over a wall, rather than blocking window view when open.

Maximum size (mm)
5,000(W) x 4,000(D)

A fresh, creative option that is simple and easy to use

Fabric panels are attached to a simple headrail system, using roller-mounted carriers. To operate, panels are then drawn sideways to create a stylish window covering or room divider.

Versatile operation

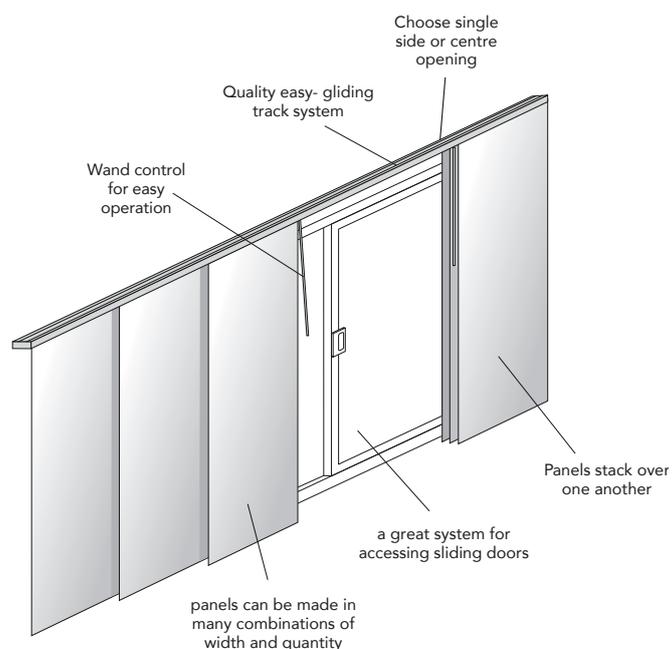

Choose the stacking option that best suits the space in your home - left/right single stack or the split stack option. Easy to use wand operation.

Modern colour range

Select your preferred interior fabric from a range of colours, textures and opacities, whether to coordinate with other interior blinds throughout the home or to make a design statement.

Aluminium headrail available in a choice of colours and channel configurations

To assist colour co-ordination, the headrail is available in Sandstone, Black, White or Clear Anodised.
