Indoor Roman Shades

/ indoor blinds

Roman shades are a stylish and contemporary window furnishing using soft fabric panels to create good privacy and light control.

Roman shades are available in simple pleats for a more formal look making them the ideal window furnishing solution for your home.

Maximum size (mm)
Determined by
Fabric Selection

A timeless and classic window treatment

Roman shades are available in a range of fabrics. Often used as a feature product they can be combined with other choices from our collection providing appropriate solutions for different window styles and creating a coordinated look across your home.

We offer Roman shades in a design choice with the option of hidden pleats.

Whether it's a modern or more traditional look that you're after, roman shades can compliment most interior design styles depending on the fabric and design selections.

Control options

Available with a one-pull cord lock as standard, our roman shades can also be chain operated (similar to a roller blind) or motorised for automation and ease of operation for high installations and child safety considerations.
